SUMMARY

- Proven experience with cutting-edge front-end technologies including React, Next.js, and Bootstrap.
- Experience Collaborating with teams of developers and designers to create responsive, mobile-first, websites and stunning UI/UX components
- Years of successful leadership experience with a track record of effective communication and collaboration.
- Solid understanding of back-end development using Python and proficiency in databases such as MongoDB and MySQL.

EXPERIENCE

Lead Front-End Developer, Good Salt Restaurant Group

Jul 2022 — Present

- Led a cross-functional developer team in creating responsive employee applications using React, GraphQL, HTML, CSS, Bootstrap, and Next.js.
- Developed a manager dashboard with custom UI components, optimizing the display of analytic employee data and enhancing managerial efficiency.
- Collaborated with managers, developers, and designers to seamlessly integrate UX principles into crafting a dynamic and responsive UI, translating their vision into a vibrant reality.
- Developed a mobile-first, user-friendly inventory database using HTML5, CSS3, and JavaScript. This database allowed employees to easily check tasting notes and comparative price points, resulting in a 20% increase in employee preparedness and a notable 30% boost in liquor sales.
- Currently leading projects including the implementation of a responsive, SEO-optimized website using React, JavaScript, GraphQL, and MongoDB, and overseeing the development of an employee testing portal using React, Next.js, and MySQL.

Technologies: React, JavaScript, HTML5, CSS3, Bootstrap, SQL, MongoDB, GraphQL, Node.js, JWT, Git

Service Team Lead and UI/UX Specialist, Reyex Mezcaleria

May 2018 — Jul 2022

- Managed company content using Wix as the content management system, synchronizing numerous company websites, and improving booking features with embedded external booking services, causing a 20% increase in reservations and a 15% increase in foot traffic.
- Improved culture training by utilizing exceptional problem-solving and communication skills, enabling staff to achieve outstanding service standards while reducing onboarding time by 20%
- Enhanced employee preparedness through the implementation of impactful UI experiences in employee applications, contributing to increased employee preparedness.

Technologies: HTML5, CSS3, SCSS, JavaScript, Wix, CMS

EDUCATION
